That portion of the journal of the Commissioners of the Navy of South Carolina contained in this volume is a part of the records of the Commissioners of the Navy of South Carolina which were returned to the State of South Carolina by an Act of the General Assembly of New York in 1911. That portion of the journal covering the period from October 9, 1776 (the date of the organization of the board of Commissioners of the Navy) to March 1, 1779, was printed in one volume by the Historical Commission of South Carolina in 1912. That portion of the journal between March 1, and July 22, 1779, has been lost. The journal had been kept in five or six thin blank books. The authorities of the State Library of New York had all of the thin volumes in their possession bound into one volume and stated before the fire of March 29, 1911, which partially destroyed the State capitol of New York, that five of them had been so bound together. This volume was so badly burned in the capitol fire that when it was received in South Carolina it was impossible to tell whether the missing portion of the journal had formed a part of the fifth of these thin blank books and had become separated therefrom and lost at the time of the fire, or had been kept in a sixth thin blank book which had been separated from its fellows and lost prior to the coming of the records into the possession of the State of New York.

The thin blank book in which this portion of the journal was kept is a little larger than the four in which the journal was kept to March 1, 1779, and, as a consequence, the margins thereof suffered more damage than did those of the first four books.

Navy Board July 22<sup>nd</sup> 1779

The Commissioners of the Navy have received your Excellencys note informing them that Gen<sup>l</sup>. Lincoln has Aquested a pilot boat to goe with a flagg to Sevannah and desiring them to Order one for that Service, and begg leave to Acquaint your excellency

that they think it would be better to provide a Nother Vessell for that Purpose as the Branch Pilots, not receiving any pay, think it a hardship to be Ordered on Service that put them out of the way of procuring Subsistence and at the Same time think it may be of bad Tendency, on accot. of the Negro Pilots being liable to be inveigled from the Boats and got into the Enemys Service; for the above reasons the Board begg leave to Recommend that a nother Vessel be Employed for the Service of a [break] lagg—
